**Premium Coconut Charcoal  
Briquettes for Global Market**

# Our Charcoal Based Products

Export Briquettes is dedicated to producing and delivering premium-quality charcoal products for both local and international markets.

We work closely with trusted suppliers and implement strict quality control to ensure sustainability, consistency, and export-grade standards in every shipment.

Our main products include Coconut Charcoal Briquettes, Wood Charcoal, and BBQ Charcoal—carefully manufactured to meet the demands of global industries such as shisha lounges, restaurants, and distributors.

Each product reflects Indonesia's natural resources—eco-friendly, renewable, and processed with precision to deliver high performance, long burning time, and clean energy output.

# Charcoal

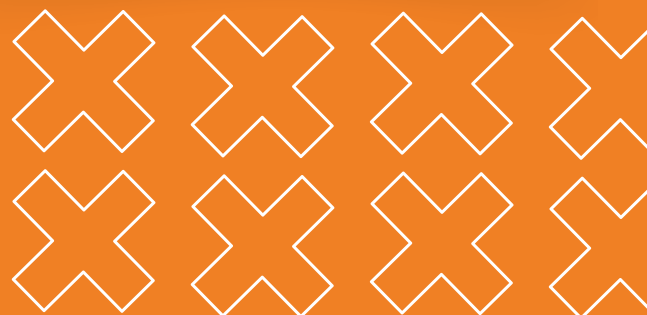

Our charcoal products are made from selected natural raw materials and processed using controlled carbonization methods to ensure consistent quality. Suitable for various applications such as BBQ, industrial use, and heating, our charcoal delivers stable heat performance and efficient burning.

# Spesification Charcoal

- Material: Natural biomass (coconut shell / hardwood)
- Fixed Carbon: 70-85%
- Ash Content: 3-8%
- Moisture: < 8%
- Burning Time: 1.5 - 2.5 hours
- Calorific Value: High
- Smoke: Low smoke emission

# Briquettes

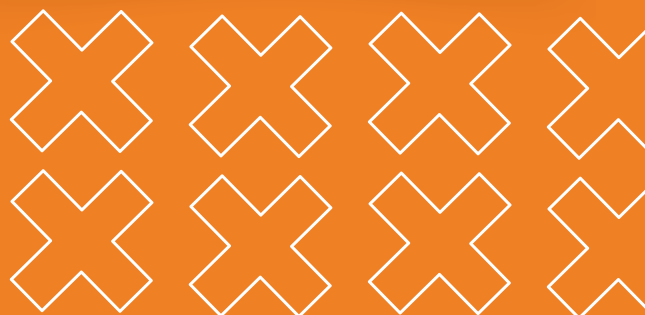

Our wood charcoal briquettes are made from high-quality hardwood and processed using advanced technology to produce high-performance and efficient fuel. These briquettes are suitable for BBQ, grilling, and various industrial applications, offering strong heat output and stable burning performance.

# Spesification Charcoal

- Material: 100% Hardwood
- Fixed Carbon: 85-90%
- Ash Content: 2-3%
- Moisture: < 5%
- Burning Time: 2 - 3 hours
- Calorific Value: 7000-7500 kcal/kg
- Odor: Odorless
- Smoke: Smokeless

# Hardwood Charcoal

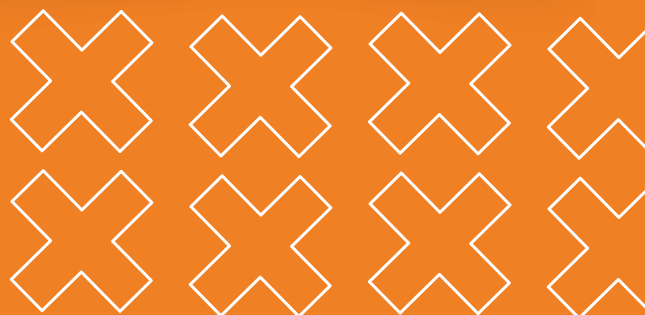

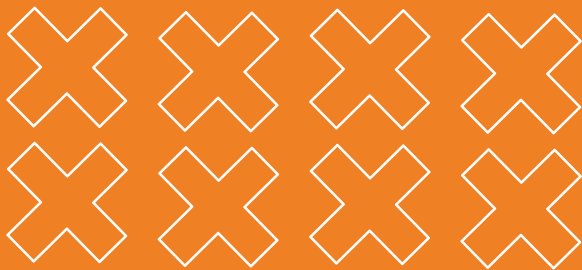

Wood charcoal is produced from selected hardwood through traditional or modern carbonization processes. It is widely used for BBQ and cooking due to its strong heat output and natural burning characteristics.

# Spesification Hardwood Charcoal

- **Material: Hardwood**
- **Fixed Carbon: 65-80%**
- **Ash Content: 5-10%**
- **Moisture: < 10%**
- **Burning Time: 1 - 2 hours**
- **Calorific Value: Medium to High**
- **Smoke: Moderate**
